Curso 2013/2014

(Código: 63014121)

1. PRESENTACIÓN DE LA ASIGNATURA

Welcome to the elective course on Social Justice and Education! This is one of the first courses offered in English at the Faculty of Education, along with the other three courses.

Education should be aimed at promoting social justice implicitly, but unfortunately this not always so, thus, it is essential to address it explicitly.

In this course we hope to equip students with the necessary competencies to question many accepted practices in education and to adopt a social justice perspective in their work.

Social Justice is based on the idea of creating a society or institution that is based on the principles of **equity** and **solidarity**, and that recognizes the dignity of every human being.

The concept has taken on a very controverted and variable meaning, depending on who is using it, and we will analyse these different uses.
